### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael D. Harris on July 19, 2006.

1. The application has been amended as follows:

In the claims:

Claims 18-20, 22 and 25 are canceled.

Claim 4, on line 2, delete "of" after "and".

Claim 9, on lines 3-4, delete "and a length in the direction of the axis,"

Claim 9, on lines 8-9, delete "being sufficiently curved to allow" and insert --allowing--

Claim 9, on lines 10-11, delete "the roller having length in the direction of the axis,

Claim 8, on line 2, delete "on the top or bottom surfaces." And insert --on the first or second portions.--

Claim 14, on line 1, delete "of claim 14" and insert --of claim 13--

Claim 15, on line 5, delete "a" after "into"

Claim 15, on lines 6-10, delete "first means for returning the roller to a first longitudinal line along the first surface when a force applied to the roller is released, second means for returning the roller to a second longitudinal line along the second surface when a force applied to the roller is released, wherein" and insert --wherein the curved surfaces

causes the roller to either return to rest at a first longitudinal point of contact along the first curved surface or a second longitudinal point of contact along the second curved surface when a force applied to the roller is released, and--

Claim 15, on line 11, insert --curved-- after "second"

Claim 23, delete lines 1-5 (every line) and insert

--23. An exercise device comprising an elongated roller formed of a compressible material, a wholly convex outer surface, a longitudinal axis and a length in the direction of the axis, a curved first surface on one side of the axis, the first surface having a first curvature with a first radius of curvature and a center and a curved second surface on the other side of the axis, the second surface having a second curvature with a second radius of curvature and center, the first curvature being different than the second curvature, the length being substantially greater than the maximum distance between the first surface of the roller and the second surface of the roller, and the maximum distance between the first and second surfaces of the roller being at least as great as half the distance between the centers of the first and second surfaces wherein the first curvature is circular and the second curvature is circular and the radius of the curvature of the surface being different from the radius of curvature of the second surface.--

Claim 24, on lines 2-3, insert --longitudinal-- before "axis"

Claim 24, on line 13, delete "and second surfaces" and insert --and second surfaces wherein the first surface has a first axis about which the first surface is formed and the second surface has a second axis about which the second surface is formed, and

Art Unit: 3764

wherein the distance from the second axis to the second surface is greater than the minimum distance from the first axis to the second surface.--
